WORK EXPERIENCE

Fullstack Developer (Saroj Educational Group) July 2025 – March 2026

- Architect, design, and deploy robust, high-performance full-stack applications from scratch using React.js and Next.js, hosting infrastructures reliably on Google Cloud Platform (GCP).
- Implement and manage secure, scalable APIs and backend systems with clean, maintainable code following strict engineering standards.

NodeJS Developer (DataValley Services) March 2025 - June 2025

- Engineered robust backend systems using Node.js, Express, MongoDB, and Redis; collaborated within a 35-member team to deliver tested, high-quality production code.
- Reduced manual posting time by integrating Google Gemini AI and automating post-scheduling.

Fullstack Developer (Suvidha Foundation) July 2024 – Jan 2025

- Designed and developed the UI and Built forum API using React.Js, Node.js, Express, Mongoddb, Postman.

Fullstack Developer (MI100 Hygiene) Jan 2024 – April 2024

- Developed full-stack e-commerce solutions, building interactive frontend UIs with React and Node.js/Express.

Fullstack Developer (Pawan Hospital) Jun 2023 – Nov 2023

- Developed a full-stack hospital management system, building the backend Appointment Booking API with Node.js/Express.

PROJECTS

AI-Powered Job Application Tracker- Resume Optimizer

[Link](#)

Built a full-stack AI-Powered Job Application Tracker using ASP.NET Core 8 + React.js + PostgreSQL, integrated GeminiAI for resume optimization and job matching.

AI Powered LinkedIn Post Automation System Using Node.js

[Link](#)

Built a Node.js/Express system to automate LinkedIn content creation, scheduling, and publishing.

EDUCATION

B.Tech in Electronics and Communication, GGSIPU, Delhi, CGPA: 8.7

2018 - 2022
